

## Hands-on Lab : Getting Started with Watson Studio

**Estimated time needed:** 20 minutes

IBM Watson Studio provides you with the environment and tools to solve problems by collaboratively working with data. You can choose the tools you need to analyze and visualize data, to cleanse and shape data, to ingest streaming data, or to create and train machine learning models.

### Pre-requisite

You need an IBM Cloud account to create a project in Watson Studio. If you don't have an account created already, click and open this [link](#) and follow the instructions, to create an IBM Cloud account.

## Objectives

After completing this lab, you will be able to:

- Use Watson Studio service
- Create project in Watson Studio
- Add an interactive python notebook to a project in Watson Studio

### Exercise 1: Exercise - Create a project on Watson Studio

*If you have not created a Watson service before proceed with Task 1, otherwise go to Task 2*

#### Task 1: For New Users (with no Watson service):

1. [Click here](#) to go to the IBM Cloud Watson Studio page. To create a Watson service, choose a plan you want to use, click **Create**. In the image below, the *Lite* plan has been chosen.

50 capacity unit-hours monthly limit

Environment = # of capacity units required per hour

- 1 vCPU + 4 GB RAM = 0.5
- 2 vCPU + 8 GB RAM = 1
- 4 vCPU + 16 GB RAM = 2
- Decision Optimization = Environment + 5

The Lite plan for Watson Studio offers everything you need to become a better data scientist or domain expert.

**Lite plan services are deleted after 30 days of inactivity.**

2. On the Watson Studio page, click on **Get Started**.

## Documentation

From getting started to how to's — see what's available.

### Exercise 2: Creating a Project

In this exercise, you will create a project.

1. On the IBM Cloud Pak for Data welcome page, click **Create a project**.

#### Work with data

Create a project for your team to prepare data, find insights, or build models.

[Create a project](#)

2. Click **Create an empty project**.

[← Back](#)

## Create a project

Choose whether to create an empty project or to preload your project with data and analytical assets. Add collaborators and data, and then choose the right tools to accomplish your goals. Add services as necessary.

### Create an empty project

Add the data you want to prepare, analyze, or model. Choose tools based on how you want to work: write code, create a flow on a graphical canvas, or automatically build models.

**NEW** AutoAI experiment tool: Fully automated approach to building a classification or reg...

#### USE TO

- Prepare and visualize data
- Analyze data in notebooks
- Train models

3. Provide a **Project Name** and **Description** and click **Add** on Select storage service if no storage service appears. If a storage appears, proceed to step 6 directly.

☰ IBM Cloud Pak for Data

## New project

### Define project details

Name

Description

### Define storage

① Select storage service

**Add**  
Add an object storage instance, and then return to this page and click Refresh.

② [Refresh](#)

4. You will be redirected to a new page. On the **Create** tab, select **Lite** plan. Then click **Create**.

The screenshot shows the IBM Cloud Pak for Data Services catalog page for Cloud Object Storage. The page has a dark header with the IBM Cloud Pak for Data logo and a user profile for Sandip Saha Joy. The main content area is titled "Cloud Object Storage" and includes a "Create" button highlighted with a red box. Below this is a "Pricing plan" section with a table of plans. The "Lite" plan is highlighted with a red box and includes details about storage capacity and pricing. The "Standard" plan is also listed. To the right of the main content is a "Summary" sidebar with details about the Cloud Object Storage service, including region, plan, service name, and resource group. At the bottom of the sidebar is a "Create" button highlighted with a red box.

**Create** About

### Pricing plan

Displayed prices do not include tax. Monthly prices shown are for country or region: United States

Plan	Features	Pricing
Lite	<b>1 COS Service Instance</b> Storage up to 25 GB/month Up to 2,000 Class A (PUT, COPY, POST, and LIST) requests per month Up to 20,000 Class B (GET and all others) requests per month Up to 10 GB/month of Data Retrieval Up to 5GB of egress (Public Outbound) Applies to aggregate total across all storage bucket classes  The Lite service plan for Cloud Object Storage includes Regional and Cross Regional resiliency, flexible data classes, and built-in security.  Lite plan services are deleted after 30 days of inactivity.	Free
Standard	There is no minimum fee, so you pay only for what you use.	<a href="#">See pricing details</a>

### Configure your resource

Service name: Cloud Object Storage-iu

Select a resource group: Default

**Create** [View terms](#)

5. Now you will be redirected to the previous new project page. Click **Refresh**.

The screenshot shows the IBM Cloud Pak for Data "New project" page. The page is divided into two main sections: "Define project details" and "Define storage". The "Define project details" section has a "Name" field with the value "Capstone Project" and a "Description" field with the value "Project description". The "Define storage" section has a "Select storage service" step with an "Add" button and a "Refresh" button highlighted with a red box. The "Refresh" button is labeled with a circled "2".

7. You have successfully created a project. Click **IBM Cloud Pak for Data** at the top left to go back to homepage.

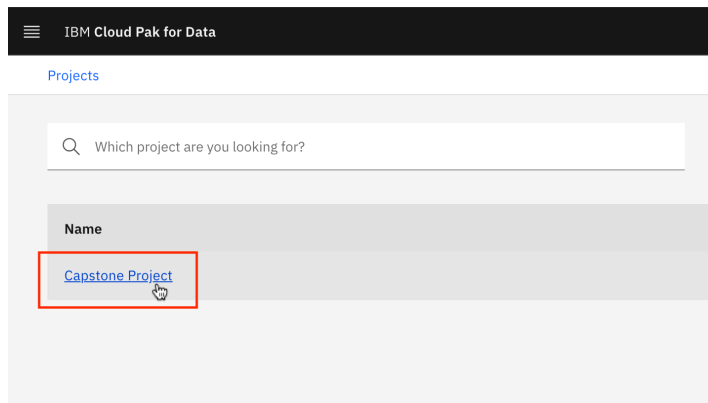

## Exercise 3: Adding a Jupyter Notebook to the Project

In this exercise, you will add an IPYNB Jupyter notebook to the Project you created.

1. From IBM Cloud Pak for Data homepage, click **Projects** under Quick navigation.

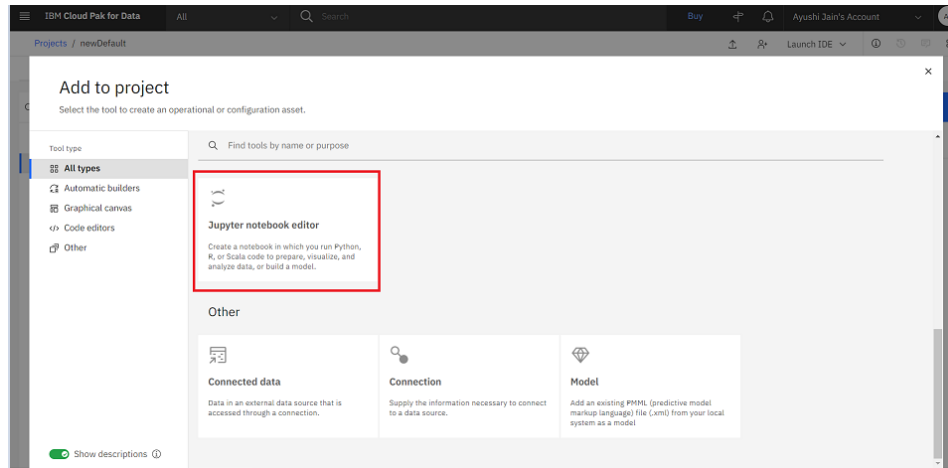

2. Select the project you created earlier.

3. On the **Overview** page of project, click **New asset**.

#### 4. Select **Notebook**.

#### 5. Right-click on this [Link](#) and copy the link address of the sample Jupyter notebook.

Under **From URL** tab, name the Notebook as **Sample Jupyter Notebook**. Then paste the link of the sample Jupyter notebook to **Notebook URL** you just copied.

## New notebook

Blank From file **From URL**

Name  
Final\_Assignment

Select runtime  
IBM Runtime 22.1 on Python 3.9 XXS (1 vCPU 4 GB RAM)

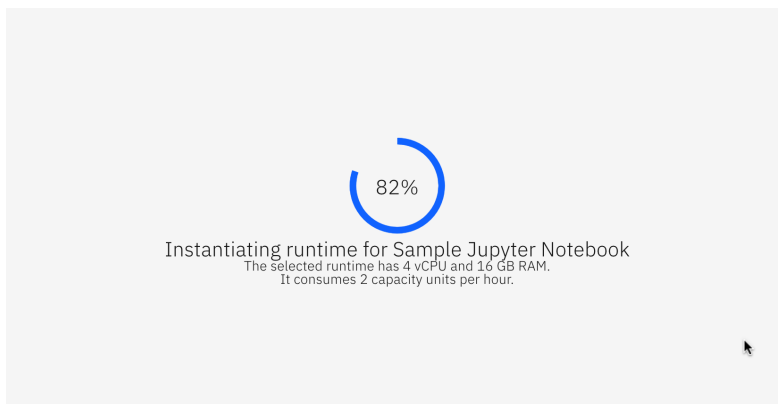

Description (optional)  
Type your description here

The selected runtime has 1 vCPU and 4 GB RAM.  
It consumes 0.5 capacity units per hour.

**This is a sample jupyter notebook**

Jupyter notebook lets you run python from your web browser.  
Here are a few simple things that you can do.

Print 'Hello World'

```
In [30]: print('Hello World')
```

Hello World

Ask user for name and the print it.

```
In [33]: name = input("Please enter your name: ")
print("Hello {}!! Hope you are having fun with jupyter notebooks.".format(name))
```

Please enter your name: sr  
Hello sr!! Hope you are having fun with jupyter notebooks.

Import a python module

```
In [4]: import sys
```

Print the version of python

```
In [5]: print(sys.version)
```

3.7.6 (default, Jan 8 2020, 13:42:34)  
[Clang 4.0.1 (tags/RELEASE\_401/final)]

Print today's date

```
In [38]: import datetime
today = datetime.datetime.today()
print(datetime.datetime.strftime(today, '%d-%B-%Y'))
```

28-October-2020
